## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-39, drawn to a receiver found in classes 348/725 or 725/151, transmitter found in classes 348/723 or 725/148, or receiver/transmitter combination.

Group II, claim(s) 40-43, drawn to specific meta-data stored on a computer readable recording medium found in class 725/20.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: All the embodiments of Group I contain a type of meta-data. Embodiments of Group II contain meta-data that contains more specifics than the meta-data from Group I. Therefore Group II represents a subcombination not essential to combination. Because these groups fall in different search areas, it would put an undue burden on the examiner to examine the limits of all the included claims.

A telephone call was made to William Frommer on 7/8/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
